Casablanca, Morocco

FULL-STACK DEVELOPER

Full-Stack Developer specialized in **React Native**, **React.js**, and **Angular**, with experience in designing and developing scalable web and mobile applications for professional environments.

Advanced expertise in **TypeScript**, frontend architecture, REST API integration, state management, and mobile performance optimization. Experience in developing real-time systems used in the aviation and institutional sectors.

TECHNICAL SKILLS

Languages	: TypeScript, JavaScript, Java, HTML5, CSS3
Frontend Web	: React.js, Angular, Next.js
Frontend Mobile	: React Native, Expo, Reanimated, Gesture Handler, Deep Linking
State & Data	: Zustand, Redux, React Query, Context API
Backend & APIs	: Spring Boot, REST APIs, JWT, Keycloak, WebSockets
Databases	: PostgreSQL, MySQL, SQL
Architecture	: Modular architecture, frontend architecture, performance optimization
Accessibility	: Web Accessibility (a11y), semantic HTML, keyboard navigation, focus management, ARIA
Tools & DevOps	: Git, GitLab, Docker, Jira, CI/CD
Quality	: Code review, debugging, application maintenance

PROFESSIONAL EXPERIENCE

IT Road Consulting <i>Full-Stack Developer</i>	Jan 2023 – Present <i>Agadir, Morocco</i>
- Development and maintenance of scalable web and mobile applications for professional environments in the aviation and institutional sectors. - Participation in frontend architecture design, code reviews, feature estimation, and technical mentoring of junior developers. - Design of reusable components and performance optimization to improve application responsiveness. - Integration of secure REST APIs and real-time services for critical production systems.	
Assignment: Royal Air Maroc <i>Web / Mobile Frontend Developer</i>	2024 – Present <i>Casablanca, Morocco</i>
- Development and maintenance of critical real-time web and mobile applications used in operational environments within the aviation sector, including crew management, flight tracking, and passenger operations. - Delivery of features in production with strong performance, reliability, and availability requirements. - Performance optimization and reduction of unnecessary renders to improve interface responsiveness.	

ENTERPRISE PROJECTS

Royal Air Maroc — Budget Flow <i>React.js / TypeScript</i>	2026 – Present <i>Budget Request Management Platform</i>
- Development of the application from scratch using React.js and TypeScript. - Design of a budget request management system with a multi-step validation workflow. - Implementation of role-based access control (RBAC) to manage user permissions and workflow actions.	
Royal Air Maroc — Flight Watch <i>React Native / Expo / WebSockets</i>	2025 – Present <i>Real-Time Application</i>
- Development and maintenance of a real-time application used by crew members. - Management of flights, passengers, crew members, and operational data. - Improvement of application responsiveness and reduction of unnecessary re-renders.	
Royal Air Maroc — RAM Assistant <i>React Native / TypeScript</i>	2024 – Present <i>Mobile Application</i>
- Contribution to version 2 with UI redesign and improvement of the user experience. - Integration of chatbot workflows and React Native performance optimization. - Implementation of a scalable frontend architecture and reusable components.	
Royal Air Maroc — Skyshop <i>React Native / React.js</i>	2024 – Present <i>E-commerce Platform</i>
- Maintenance and development of features for a duty-free platform. - Optimization of performance and production stability on mobile.	
ITROAD - Agency for Agricultural Development (ADA) <i>React.js / Spring Boot / Docker</i>	2023 <i>Institutional Platform</i>

- Development of web solutions with REST API integration.
- Participation in production deployment and scalable frontend architecture implementation.

ITROAD - Mohammed VI Foundation

Angular

2023
Enterprise Platform

- Maintenance and enhancement of features for institutional web applications.

EDUCATION

Bachelor's Degree | BAC+3 | Science and Technology

Ibn Zohr University — Faculty of Sciences

2017 – 2018

Agadir, Morocco

Specialized Technician | BAC+2 | Software Development

Specialized Institute of Applied Technology

2016 – 2017

Oulad Teima, Morocco

High School Diploma in Physical Sciences

Abdallah Chefchaouni High School

2014 – 2015

Oulad Teima, Morocco

SOFT SKILLS

- Technical communication
- Problem solving
- Teamwork
- Sense of responsibility
- Continuous learning
